# Solanium

REDEFINING FUNDRAISING THROUGH DECENTRALIZATION

OVERVIEW

The Solanium platform is a decentralized platform on the Solana blockchain. The platform will introduce **decentralized fundraising**, **time-weighted token staking** and **governance voting** to the Solana ecosystem.

Giving high priority to both UI and UX, as good UI is one of the core principles that are currently lacking or not prioritized in the ecosystem. It is one of the most important factors to onboard new(bie) users to the Solana ecosystem.

KEY METRICS

Ticker:	**SLIM**
Total supply:	**100,000,000** SLIM
Initial circulating supply:	**30,000,000** SLIM
Initial market cap:	**$6,000,000**
Full diluted marketcap:	**$20,000,000**
Initial liquidity:	**15,000,000** SLIM
Token utility:	● Staking ● Fee distribution ● Exclusive pool access ● Governance voting

TOKEN ECONOMICS

100M
Total Supply

Circulating supply

● **25% Supply, raising a total of $3.5M**
5% Seed - $500,000 at $0.10 per token
20% unlocked at listing, 20% each month thereafter.
15% Private - $2,000,000 at $0.133 per token
20% unlocked at listing, 20% each month thereafter.
5% public – $1,000,000 at $0.20 per token
Fully unlocked

● **20% Team**
100% locked for 6 months, 10% unlocked each month thereafter.

● **5% Advisors**
100% locked for 6 months, 10% unlocked each month thereafter.

● **15% Liquidity**
Fully unlocked.

● **10% marketing, staking rewards, trading rewards**
60% unlocked, 10% unlocked each month.

● **25% company reserve**
100% locked for 1 year.

Staking

By staking the SLIM token the user receives xSLIM. xSLIM qualifies the user for fee distribution, exclusive pool access and governance voting. SLIM tokens are lockable for a selectable locktime, by locking tokens into the future the user receives bonus xSLIM tokens.

Pools

The core function of the platform will be Solanium Pools. On Solanium Pools, anyone with a Solana wallet can create a pool, it is an open platform. Every pool has a fixed fee that gets distributed to xSLIM holders.

Trade

The first phase of the platform will be launching a custom GUI for the Serum DEX. Finalized pools can immediately create a Serum market and start trading on the permission-less DEX.

Governance

The first phase of the Governance will be a mix between a centralized solution and blockchain voting. The application will be open to other Solana projects, that are able to create their own environment on there.

Q2 2021
- Base platform launch: new website, tradable DEX UI
- Beta tester incentive program
- Public Token Sale
- Liquidity Provider incentive program

Q3 2021
- Token staking launch
- First phase of Solanium Pools live

Q4 2021
- Second phase of Solanium Pools live (extended functionalities)
- Start development Governance

Q1 2022
- First phase of Governance live
