Sango

Paving the way to a digital future
of endless possibilities

sango.org

The first "Crypto Initiative"
The Sango Project is a "Crypto Initiative" that was started by the Central African Republic National Assembly and supported by the President

Sango.
The Objectives

Objective #1

Building directly in the heart of Africa the first legal Crypto Hub, recognized by a country's parliament, that welcomes businesses and attracts global crypto-enthusiasts

Sango.
The Objectives

Objective #2

Taking the Bitcoin legacy to the next level

Objective #3

Sango – The Crypto Island

Premises

APRIL 21

The Central African Republic, made headlines when adopted Bitcoin as legal tender, making it the first country in Africa to do so and the second in the world after El Salvador

MAY 5

The Central African Republic received approval for a $35M development fund from The World Bank for the digitalization of the public sector. The World Bank is not part of the Crypto Initiative.

Premises

Before the end of 2022

Before the end of 2022, The Central African Republic will be the first country in Africa to create a dedicated legal framework for cryptocurrencies

The Central African Backbone (CAB) Internet Interconnection will be finalized powering the entire digital transformation of the Central African Republic

Creating the proper conditions for a digital first and thriving crypto-economy

The "Bitcoin law" ("Law number 22" from the 21st of April) also specifies the following

1 All exchanges in cryptocurrencies are not subject to taxes

2 Marks the birth of the National Agency for Regulation of Electronic Transactions (Agence Nationale de Regulation de Transaction Electronique "ANTE")

Sango.
The Legal Framework

Digital ownership

recognized by official government entities

6

Digital identity

recognized by all official government entities

7

Sango.
The Legal Framework

8

Crowdfunding framework
Crypto crowdfunding for infrastructure projects (public-private partnerships)

9

Tokenization framework
Tokenization framework for assets and national Central African resources

Sango.
The Legal Framework

10

Creation of the Digital National Bank
Banque Nationale Digitale de la
Republique Centrafricaine – BNDRC

Allocation of Resources for Crypto Projects

Allocation of Resources for Crypto Projects

The state will fully support the access to the country's natural resources such as **gold, diamonds, uranium, iron ore, copper, coltan, cobalt, nickel, lithium and petroleum**
Allocation of Resources for Crypto Projects

As the government is the principal landowner in the Central African Republic, it will be facilitating land acquisition in Bitcoin for worldwide investors

# Sango – The Crypto Island

Sango.
The Crypto Island

Will be declared as "Crypto Economic Zone"

Will allow users to propose, to view and to contribute to the future developments of Sango, The Crypto Island

Sango will be the first island in the Metaverse that is backed by reality

Sango.
The Crypto Island

Linking the real world (real estate, fractional ownership) to the Metaverse representation, while adding extra layers for future expansion

Will allow users to manage their NFTs in the Metaverse in order to unlock additional functionalities: marketplace, ownership, funding, tokenization of assets

Will allow NFT minting in the Metaverse for an additional layer of business services

sango.org
Call to Action

Participate in creating the digital infrastructure of tomorrow, powered by blockchain technology

Call to Action

Develop an ecosystem that embodies the following

1. Wallet: send, receive and store Bitcoin

- **User friendly multi-platform wallet application for mobile (iOS, Android), web and desktop (Windows, MacOS, Linux)**

- **Requires compatibility with layer-2 implementations such as the Lightning Network (BTC/LN)**

- **Compatibility with Point-of-Sale (PoS) for businesses to accept crypto-payments**

- **Integrated automatic accounting system for enhanced VAT collection**

Call to Action

Develop an ecosystem that embodies the following

2. Digital identity and ownership solutions

Encrypted biometric data that uses privacy-preserving techniques based on zero-knowledge proof systems

Each user will be assigned a custom NFT that will enable data protection against theft and leaks with a build-in privacy system

Call to Action
Develop an ecosystem that embodies the following

3. Tokenization solutions

Democratization of investments and easy acces to capital

Fractional investments for larger participation

Call to Action

Develop an ecosystem that embodies the following

4. Sango Metaverse ecosystem

First Metaverse backed by reality

The virtual representation of the island will be mapped 1:1 to reality

Open for proposals.

Pave the way to a digital future of endless possibilities
